

TEXTOR

the smart text animator

Version 1.1.1
marcosanasi@hotmail.com
aescrpts.com/textor/

Copyright © 2016 - 2018 Marco Sanasi. All rights reserved.

- **Textor** is a text animation and managing tool for After Effects.
- Textor is **slider based**: no need to change keyframes values! Just move the sliders and Textor will animate the related sliders properties
- The **Transform tab** and the **Fx tab** let you animate many different kind of properties. The Behavior tab lets you control the animation: range, delay, ease, bounce, elements order and more.
- Textor also includes a **1 click Random animation generator**: It creates random text animations based on the properties you choose to randomize and the limits you set.
- The **Presets tab** lets you manage animations: you can save, remove, rename, export and import to file your animations.
- Textor is **size independent**. It applies animation presets keepin in mind composition size and text scale, so the animation is always the same, redardless of elements dimensions.

Installation.

Copy "Textor 1.1.jsxbin" to your ScriptUI Panels folder, depending on the OS.

Windows:

C:\Program Files\Adobe\Adobe After Effects CC 2018\Support Files\Scripts\ScriptUI Panels\
